You are already a savings champion!

■ The Magic of Growing Money

Why investing is like planting a mango tree!

Plant ONE mango seed. Year 1 — tiny plant. Year 5 — small tree. Year 10 — huge tree giving 100 mangoes! And those mangoes make MORE trees! This is COMPOUND INTEREST — your money grows, then that growth grows, then THAT growth grows!

You Invest/Month	After 5 Years	After 10 Years	Your Wealth Now
■5,000	■4.1L	■11.5L	■37.5L
Small but powerful	At 12% growth	Compounding magic!	Starting base

■ The earlier you start, the bigger your tree grows!

- Invest just ■5,000/month TODAY — set it up once, then forget it
- After 5 years at 12% growth: ■4.1L — without doing anything extra!
- After 10 years at 12% growth: ■11.5L — that is the magic!
- The idle cash loses value. Invested cash multiplies!

"Compound interest is the eighth wonder of the world. He who understands it, earns it; he who doesn't, pays it! — Albert Einstein"
